**Ursula Manuelpillai** (Australia)

## ORGANIZATIONAL SECRETARIAT

### Marco Evangelista

Brescia, Italy  
[crem@poliambulanza.it](mailto:crem@poliambulanza.it)

## ABOUT

Besides having an essential and unique role in fetal development and preparation for life outside of the womb, mounting evidence suggests that the human placenta may also hold the key to treating several conditions which arise during life itself, whereby tissue or organ function is compromised due to disease or injury.

## REGISTRATION DEADLINES:

Abstract submission: August 15th, 2010

Registration: September 15th, 2010

The programme for this event was reviewed and approved by the EMBO Courses Committee.

# From fetomaternal tolerance to immunomodulatory properties of placenta-derived cells in cell therapy
